financial reporting and analysis 1e by david guenther was written for instructors wanting to emphasize a more conceptual framework to their intermediate accounting course financial reporting and analysis examines financial reporting through the lens of economic theory giving students a way of understanding how all the rules relate to each other and to the overall goal of financial reporting this text also provides students with how financial information is used giving students a better framework about how particular rules relate to the whole structure of financial reporting finally david guenther wrote this text to be rigorous in terms of topic coverage while at the same time avoiding much of the detail that seems to overwhelm students while reviewing you will find that we did not strip down or simplify a traditional intermediate accounting text but rather challenge students with concepts and ideas rather than details and rules

financial reporting provides an overview of a business profitability and financial condition in both short and long term a hot topic in the current market climate financial reporting and regulation explains the meaning behind the rules of financial reporting as opposed to just the implementation of these rules it contains sufficient detail on the application of standards to enable the reader to appreciate the effects of the rules and the logic behind them is described in terms of the reasoning and history behind their development this will give readers a more informed insight of the regulations than many of the practical books currently on the market
